

AIRCRAFT GROUND HANDLING VIDEO

Written by Capt. Sarah Wildman

Friday, 19 March 2010 21:27 - Last Updated Monday, 20 September 2010 08:06

TO ALL KSWG PILOTS:

This is a reminder that all CAP Pilots are required to complete Aircraft Ground Handling Video training annually by the 30th of September in order to remain current. Training is automatically recorded in Ops Quals when a member completes it online, or units can also administer the training locally following the instructions available online. If this training is not completed before the 30th of September, Ops Quals will show this as an expired requirement. This requirement is being incorporated into CAPR 60-1 as an annual obligation to maintain flight currency as originally outlined in the implementing policy. Some wings require their check pilots to verify this prior to conducting annual form 5s for their pilots in order to be sure this is not missed, but either way we wanted to send out a reminder so that you don't have personnel lapse in currency unnecessarily. Members that need to re-accomplish this training or units desiring to download and present the training can get what they need at:
